Front-end Development
- React Js, Angular Js, Next Js
- HTML, CSS, JavaScript ,Bootstrap, Tailwind CSS

DevOps & Deployment
- Docker, CI/CD, Nginx, Apache, Vercel, Netlify

Version Control
- BitBucket, GitHub

Personal Profile

A highly motivated undergraduate student at Sri Lanka International Buddhist Academy (SIBA Campus), with a strong foundation in PHP development and a passion for building dynamic, scalable web applications. Skilled in Laravel, MySQL, JavaScript, and object-oriented programming, with hands-on experience in implementing CI/CD pipelines and collaborative development workflows. Eager to contribute to innovative and performance-driven web solutions, while continuously learning and growing in a fast-paced development environment. Actively seeking a PHP Developer (Laravel) position to apply technical expertise and deliver high-quality applications that make an impact.

Projects

Library Management System with AI
- Developed a LMS for the campus as a university project using Laravel. Made some innovations using AI features.

Mobile App Campus Material Library Management System
- This is a sub project for my LMS. I created a LMS functions for mobile using React-Native.

ShoppingCart Library For Laravel
- ShoppingCart is a simple and lightweight package for managing a shopping cart in Laravel applications using sessions. This package is ideal for e-commerce platforms or any project requiring shopping cart functionality.

Project Seebeyond
- Using Raspberry pi computing unit Developed a system for blind people. Using this blind people can know what are the objects in front of them. They can pass the obstacales.

Online Ticket Booking System
- Developed this as a university project using JAVA WEB PAGES (JSP) and JAVA SERVELETTES. Using MYSQL Database as a DB Driven system.

Supplier Management System
- Developed a SMS for a client as a university project using JAVA WEB PAGES (JSP) and JAVA SERVELETTES.

Spring Boot API Application
- Developed a CRUD based application using springboot API.

To Do App using MERN STACK
- Developed this as a university assignment using MERN stack. (MongoDB, Express JS, React JS, Node JS)

Angular CRUD App using Laravel API
- Developed a CRUD based application using AngularJs as a frontend. For the backend I used the laravel API.

Niwahana Application
- Developed a web-based House Architectural Cost Calculation system as a university assignment for a real client. This application was designed to meet the client's requirements for accurately estimating architectural costs.

Angular CRUD App using Laravel API
- Developed a CRUD based application using AngularJs as a frontend. For the backend I used the laravel API.

Work Experience

Peer Tutor   2024-2025
Sri Lanka International Buddhist Academy SIBA Campus)

As a Peer Tutor (Intern), I have supported students' academic growth by simplifying concepts, guiding assignments, and managing lab operations. I provided technical assistance with tools like Microsoft Office and Graphic tools, enhanced my communication and leadership skills, and collaborated with lecturers to deliver effective teaching. I'm specialized in Networking, Java, PHP, MYSql and Computer Hardware.

Student Intern   2022-2024
Sri Lanka International Buddhist Academy SIBA Campus)

Worked as a student intern in SIBA Dynamics. It's a sub department of SIBA Campus. Manage the team as the head. Delivered some projects as client required.
